INTRO

The quarterly rates are a document that reflects the approximate prices of Art-W Studio services in the current quarter, this document is updated the first week of each quarter and is valid until the last day of the month of the quarter in question.

The new services that will be included in our studio will be reflected in this document. The prices shown in this document are not definitive or binding and a personalized quote will always be required to carry out a project with us.

HOW WE WORK

We always work with customized proposals for each client. Due to the nature of our work, we do not have strict rates to stick to because each project we carry out in the studio is unique.

However, to make your work easier when it comes to calculate an approximate investment required for your project, we have compiled several projects with prices updated to the current rates and developed some indicative price tables. We have also tried to solve the most frequent doubts about what is included in each service we offer.

For any questions or an exact quote for the project you have in mind you can always contact us directly via WhatsApp (+34 722 30 60 60 02) or the forms on our website.

ANY FEARS?

FAQS PAINTING

The rates in the tables are a guideline of usual prices for that category of minis. However, these can be affected by factors such as the paint scheme requested, minis with conversions or any other type of modification that increases the time needed to be painted. It can also be the case of minis with simple schemes that fall below the price range of their category.

From one level to another we double the time dedicated to the figure. A Game level miniature (infantry) takes from 30 to 50 minutes of work, being from 1 to 2h in the Ornate level and from 2 to 4h in the Premium level. The time spent varies according to the complexity of the model and the scheme and is directly related to its price.

Below are examples of work at each level:

[GAME](#) / [ORNATE](#) / [PREMIUM](#)

INCLUDES DECALS / UNIT MARKINGS / FREEHAND?

| CATEGORY | | DECALS | MARKING* |
|----------|----------|--------|----------|
| Game | Infantry | No | No |
| | Vehicle | No | No |
| Ornate | Infantry | 0 - 1 | 0 - 1 |
| | Vehicle | 0 - 2 | 0 - 2 |
| Premium | Infantry | 0 - 2 | 0 - 2 |
| | Vehicle | 0 - 4 | 0 - 4 |

*Simple markings such as lines, geometric or numbers in one ink.

IT INCLUDES THE PRICE OF THE BASING?

No, it only includes the price of painting the minis already assembled, the bases are a separate service.

ARE THERE ANY VOLUME DISCOUNTS?

No, the prices shown are for armies, bands or complete units. In the case of single minis, the price increases because each piece takes more time to be painted as it cannot be painted in series.

UNTIL WHEN ARE THESE PRICES VALID?

We update the prices quarterly; these prices are valid until 12/31/2024. After that date they could be modified and would be reflected in the PDF of the Q1 2025 rates.

HOW ARE THESE PRICES CALCULATED?

We base the prices on our experience painting minis and the time required for similar models in the past.

IS VARNISH OR ANY KIND OF PROTECTION INCLUDED?

We always seal our models with 2 coats of varnish to offer a perfect protection and a matte finish to make the paint job stand out.

ARE CHANGES INCLUDED IN THE PRICE?

We make a sample minis to validate the scheme (included in the quote), once validated no modifications will be accepted in the order, except for a small variation that requires less than 5-10 minutes.

IS THE PRICE THE SAME FOR MINIS THAT ARE HALF PAINTED?

We do not accept half painted projects, to guarantee the quality of Art-W all the projects that are made in the studio start from 0. In case of having half painted minis, we offer you the service of unpainting or if it is feasible and does not affect the quality we will print again on the previous work.

FAQS **BASING**

Unlike the painting rates, the bases, being a more delimited product, do have exact rates if we carry out one of the options we have standard. For special bases that are not included in our catalogue, they will be quoted separately regardless of the prices shown above.

The usual bases are:

Mars / Snowfall / Forest / Swamp / Urban / Ruined Temple / Desert

Each level includes the following:

Game: Texturing of the base according to the desired environment, pigments, and environmental shading + non painted element (tuft, snow...)

Ornate: The above + a variety of heights and volume between the bases. With cork or similar and up to 2 decorative elements (bushes, 3d bits, radioactive puddles...).

Premium: The above + up to 4 decorative elements, more detailed painted bits, and more elaborate environments with more variety.

IS IT POSSIBLE TO MAKE BASES THAT ARE NOT THE USUAL ONES?

Yes, the bases that are not the ones we classify as usual will have a different price than the prices in the table, but we can make any type of base.

IN CASE OF TRANSPARENT BASES, FLYING TYPE, WHAT DO YOU DO?

We always recommend decorating them in the same way as the rest of the bases, because in the end with the passing of time these types of bases end up scratching and turning whitish.

CAN YOU MAKE SCENIC BASES WITH CORPSES OR OTHER MINIATURES ON THE BASE?

Yes, but in that case, there will be an extra cost as we must paint the miniatures that are on the base. These will be painted at the same level as the base, in Game level bases we will paint the miniature at our painting Game level.

FAQS

ASSEMBLY

The prices shown below include the assembly service and cleaning of mould lines, as well as filling any joints that may remain between the pieces. The assembly is always done in a dynamic way so that your minis stand out from the rest.

In addition to the assembly service, we have the service of magnetizing, the cost of magnetizing is based on the number of pieces to magnetize, size of the model, level of painting among others. For which we make a customized quote each time.

DOES IT INCLUDE THE PRICE OF THE MINIATURES?

No, it only includes the price of assembling and cleaning of sprue marks and mold lines. We buy the miniatures separately.

CAN YOU DO KITBASHING SO THAT THE UNITS DO NOT ALL LOOK THE SAME?

Whenever possible we combine pieces from different boxes within the project, for example, heads so that the miniatures and units look less monotonous. We also try to alternate as much as possible between the different poses for each mini.

ARE CONVERSIONS INCLUDED IN THE PRICE?

No, we have some prices in the following pages for the conversion and putty services. The assembly service only includes some small kitbash.

IS THE PRICE THE SAME FOR MINIATURES THAT ARE HALF ASSEMBLED?

It will depend on the state of the figures if they are well assembled or have many burrs and mold lines. Many times, it is more complicated and laborious to clean the miniatures already assembled than to remove the imperfections of each piece individually. This should be considered on a case-by-case basis.

CAN I SEND ALREADY ASSEMBLED MINIATURES?

Yes, but in that case, we put a lot of emphasis on making sure that they arrive clean and free of mold lines and imperfections. We also offer the service of reviewing the assemblies previously made to ensure a perfect finish in the painting of your minis.

CAN I CHOOSE THE BITS I WANT YOU TO USE?

Yes, the assembly is completely custom-made, in case of not specifying some options we will always opt for the best visual composition, in the end the rules are changing, but your miniature will always look amazing on the table.

FAQS

FREEHAND'S

We classify the freehand according to their size and the number of colours needed to make them. It is not the same to make an omega of Ultramarines in white, then a skull with 4-5 different tones of bone colours to generate depth in the drawing.

The table serves as a guide for simple drawings such as heraldry, names, numbers... For complex freehand representing more elaborate shapes with several colours, prices will be studied on a personalized basis.

Very complex shapes can be budgeted above the price ranges even if they are in 1 colour, such as tribal tattoos or similar.

WHAT SIZE CORRESPONDS TO EACH CATEGORY?

The standard sizes we give in the tables are as follows.

S – For items that can fit on the knee pad of an Intercessor, small numbers or some simple tattoo.

0.5X0.5 cm approx.

M – Marine shoulder pad heraldry, texts on dread ribbons or tanks.

1X1 cm approx.

L – Contemptor Dreadnought shoulder pad, Rhino door or similar.

3X3 cm approx.

XL – IK Shoulder Pad or Land rider / Repulsor door. 6X6 cm approx.

FAQS

TAILOR-MADE MINIS

When we work with putty we must do each process at the right drying point, that is why we offer this service as packs. In a session of 2 hours, we can do 1 tabard or up to 4 and we charge by sessions not by pieces. The more complex the piece to be done, the less units we have time to do between drying times, having to do the more complex ones individually.

The table shows the most common works we do, but we can carry out any other idea you may have and make a personalized budget for it.

The difference between the Standard and Advanced finish is in the sculpting time, resulting in pieces with complexity. An example photo on the right for a clothing loincloth.

In the advanced level the work on the folds of the clothing and the joints in the belt of the miniature stand out, while the standard level is flatter and simpler.

This same work done on the clothing loincloths is used as a base for the different types, fur, scales, chainmail... being always more dynamic and richer in details in the Advanced level. If your minis will be painted at Premium level, we recommend using Advanced sculpting for your project.

ON WHAT BASIS ARE THESE PRICES CALCULATED?

We base our prices on the number of 1h sessions needed to perform the work. Within these sessions and depending on the complexity of the piece to be made, we can make from 1 to 4 units. Therefore, we will charge the same for making 1 tabard than 4, since that session is reserved exclusively for that putty work because we must be very aware of the curing times and perform each action at the right time to achieve the perfect result.

ARE THE MODIFICATIONS INCLUDED IN THE PRICE?

Before fixing the different pieces in a conversion or making the definitive sculpts we always send photos of provisional assemblies so you can get an idea of how everything is going to look like. If the pieces are not assembled or sculpted, you can make modifications on the project.

FAQS

3D PRINTING

The 3D printing service does not have a fixed price list, the purchase of STL files will be charged if necessary, and the cost of material and handling of the prints.

The cost of printing and handling is around 1-2€ for an infantry miniature, this price is an approximation, and the final price will be determined by the material and printing hours calculated by the printer software.

When it comes to printed bits for bases, these are already included in the basing budget and are not considered as an additional cost.

In the case of miniatures in several pieces that will be painted in the studio, the assembly of the same will be charged as a separate service.

ARE THERE VOLUME DISCOUNTS?

The price will depend on the calculation made by the printing software and the hours necessary to handle both the digital files and the post-processing of the prints.

DOES THE PRICE INCLUDE THE STL?

No, files that are not free will have to be paid additionally to the printing service.

CAN I CHOOSE THE BITS I WANT YOU TO USE?

Yes, we can print any STL you already have or if you tell us where to get it/buy it. And then use these printed pieces combined with our conversion services to create any miniature.

ARE YOU CLEAR ON WHAT YOU NEED?

Contact us and we will send you a personalized quote as soon as possible.
